

William Amor

Principal Product Owner | London, UK | message@william-amor.info | linkedin.com/in/willamor | william-amor.info

PROFESSIONAL SUMMARY

Principal Product Owner with 8 years in insurance, consumer health, and pharma. At Marsh I own brokering operations products that track \$15bn+ in client premiums. Product work I led helped teams find \$8m+ in new placement opportunities, with \$2m in attributed revenue. Before that, Kenvue and Johnson & Johnson: Amazon 360 with commercial users (sales uplift in the millions), and an EMEA automation function built from scratch with \$800k CIO funding (2,800 hrs/year returned). Earlier roles at Pfizer in regulatory affairs and GSK in manufacturing. Used to delivering in heavily regulated environments.

IMPACT HIGHLIGHTS

- At Marsh, built placement and commission insight features that helped broker operations find \$8m+ in new premium opportunities, attributing a one-time \$2m revenue uplift to work done with the product.
- At Kenvue, built Amazon 360 with EMEA commercial users: listing performance and sentiment in one place, so teams could prioritise the listings most likely to grow. Sales uplift in the millions.
- At Johnson & Johnson, set up an EMEA automation function from scratch with \$800k CIO funding. 2,800 hours/year returned.
- Also at Johnson & Johnson, set up an EMEA early-talent programme: UK intake first, then regional sponsorship from the Kenvue EMEA CIO. Recruited and line-managed 3 cohorts in the UK, Germany, and Dubai over 3 years.

EXPERIENCE

Principal Product Owner | Marsh | London, United Kingdom | Aug 2024 - Present

- Own client-facing and internal products in global brokering operations tracking \$15bn+ in premiums. Lead squads of up to 25 engineers, analysts, and designers, working with MD and Partner stakeholders.
- Built placement and commission insight features that helped broker operations find \$8m+ in new premium opportunities, attributing a one-time \$2m revenue uplift to outcomes delivered using the product.
- Defining a cross-sell feature now in late development: where Marsh can sell more coverage classes to existing clients. Expected value in the multiple millions.
- Set strategy, roadmaps, and OKRs with MD/Partner stakeholders. Cut scope and moved capacity when the ROI did not stack up.
- Use Pendo for usage and engagement so roadmap calls are based on what people actually use. Own defect triage through to fix on shared infrastructure.
- Use Figma Make (Figma's AI) to rapid-prototype and take feedback live with clients and internal users on calls before we build.

Data & Analytics Product Owner (EMEA) | Kenvue (formerly a Johnson & Johnson company) | Buckinghamshire, United Kingdom | Jul 2023 - Jun 2024

- Owned an EMEA portfolio across digital, eCommerce, and marketing: vision, backlog, and delivery. Worked with a senior product manager on investment and squad capacity.
- Built Amazon 360 with EMEA commercial users: listing performance and sentiment so teams could focus on the listings most likely to grow. Uplift in the millions.
- Moved digital, eCommerce, and marketing data onto Snowflake for EMEA reporting. Built SQL datasets to see what we could pull into products.
- Ran prioritisation and stakeholder reviews. Dropped work when the ROI was not there.

IT Business Technology Leader (Leadership Programme) | Johnson & Johnson | Buckinghamshire, United Kingdom | Sep 2022 - Jul 2023

- IT business partner for the ~\$500m UK consumer health business across digital, data, commercial, and operational IT.
- Picked by the North America CIO to deliver BI and automated ordering in LATAM/ASPAC (~\$1m P&L impact). Built the dashboard with a third-party team in Cairo.
- Set up an EMEA early-talent programme: started in the UK, then won regional sponsorship from the Kenvue EMEA CIO with hiring in the UK, Germany, and Dubai (3 cohorts over 3 years).
- Piloted a new e-learning platform: user workshops, RFP, and vendor evaluation.

Intelligent Automation Product Manager (Leadership Programme) | Johnson & Johnson | Buckinghamshire, United Kingdom | Jun 2021 - Sep 2022

- Built an EMEA automation function from scratch with \$800k CIO funding (Power Platform, Alteryx, UiPath). 2,800 hours/year returned. Became the strongest automation team in the region year on year.
- Recruited and led developers in the UK, Egypt, Portugal, and Kosovo. Focused on process improvement and building in-house apps instead of buying off-the-shelf tools. Six-figure savings across EMEA.
- Supported the deployment and ongoing support of Veeva PromoMats for regulated promotional content workflows.
- Set up intake, governance, prioritisation, and delivery. Line-managed developers and interns.
- Ran the compliance review with infosec and Microsoft for Power Automate Desktop, which opened up citizen development across the company.

Global Project Coordinator | Pfizer | Kent, United Kingdom | Sep 2019 - Jun 2021

- BA/PA on a new Pega platform for global regulatory interactions with health authorities. It was not live when I joined. Wrote requirements with the digital delivery team and worked with implementers through build, UAT, and regulated release. Later used to track interactions for Comirnaty (COVID-19 vaccine).
- Wrote clinical and medical process documentation to FDA, EMA, and MHRA compliant standards.
- Owned change control and audit trail for regulated software releases.
- Ran training and demos on the new Microsoft 365 workplace across a 120,000-person organisation.

Technology Business Partner (Industrial Placement & Part-time) | GSK | Hertfordshire, United Kingdom | Jun 2017 - Aug 2019

- Reported to the Director of Engineering Services. Led a multi-million-pound BI programme for overall equipment effectiveness (OEE): built business cases for global manufacturing sites, secured approval from the senior project approval board (director/VP), and coordinated a team of six to deploy across LATAM and EMEA.
- Took GxP manufacturing sites worldwide from paper to paperless calibration for production machinery using Beamex Paperless Calibration Management (PCM): fewer defects, safer supply, digital records.
- Tested a COTS solution for data integrity and fit to business needs and pharma regulations (MHRA, FDA, and others). Wrote and ran UAT packs and raised defects with application support.
- Ran usability surveys on a plant maintenance application against other GSK tools, then presented gaps and recommendations to senior leadership.
- Defined requirements for a global RPA tool to monitor stock thresholds and auto-order parts for medicine supply. First global automation initiative in manufacturing IT. Did not go live after a reorganisation.
- Worked with teams in the US, Ireland, Poland, India, Egypt, and Saudi Arabia. Hosted early-talent public speaking and presentation sessions. Kept on part-time through final year (20 hrs/week); only person from that intern cohort retained.

EDUCATION

University of Kent - BSc (Hons) Computing and Business Administration with a year in industry | First Class Honours, US GPA equivalent: ~4.0

- Year in Industry at GSK, then kept on part-time (20 hrs/week) through final year. Graduated with First Class Honours.
- Dissertation on FinTech ("The disruption and emergence of FinTech"), First Class.

CERTIFICATIONS

- SAFe 5 Agilist
- ITIL v3

TOOLS & PLATFORMS

Product & delivery: Agile, Change control, Confluence, Discovery, Figma, Figma Make, ITIL, Jira, OKRs, Pendo, Regulated delivery, SAFe, UAT

Data & analytics: ETL, Power BI, Qlik, Snowflake, SQL

Automation: Alteryx, Automation Anywhere, Power Platform, RPA, UiPath, Veeva

Build & platforms: AWS, Beamex PCM, Microsoft 365, MUI, Pega, React
