

William Amor

Principal, Product Owner | London, UK | message@william-amor.info | <https://linkedin.com/in/willamor> | <https://william-amor.info>

PROFESSIONAL SUMMARY

Product Owner with 9+ years delivering products across insurance, consumer health, pharmaceuticals and financial services. At Marsh, I lead broking and claims analytics products for consultants and clients, shipping new functionality that has uncovered millions of dollars in commercial opportunities.

My career spans commercial sales and marketing, regulatory affairs, and global manufacturing supply chain. At Kenvue and Johnson & Johnson, I built commercial analytics and Amazon marketplace tools driving multi-million-dollar growth, and scaled a regional automation function from the ground up. Earlier, at Pfizer and GSK, I delivered technology in highly regulated environments - including a system that helped streamline regulatory approval for the Comirnaty COVID-19 vaccine.

IMPACT HIGHLIGHTS

- Owned Marsh's insurance insight products, surfacing \$8m+ in commercial opportunities and generating \$2m in revenue.
- Led Amazon 360 at Kenvue - a sentiment analysis product that drove multi-million-dollar sales uplift.
- Built a regional automation function and product suite from the ground up at J&J, saving thousands of hours and hundreds of thousands of pounds by migrating third-party tools in-house.
- Defined requirements for Pfizer's health authority tracking product, later deployed to support Comirnaty (COVID-19 vaccine).

EXPERIENCE

Principal, Product Owner | Marsh | UK | Aug 2024 - Present

- Own client-facing SaaS and internal data products for broking operations (billions in premiums).
- Present the workplace benefits analytics product to clients in RFPs and demos.
- Lead three cross-functional squads (20+ engineers, analysts and designers) from discovery to release.
- Run discovery with broker and consulting users: interviews, journey mapping, workshops and usability testing.
- Delivered placement and commission insight products end to end, uncovering \$2m in new revenue.
- Rapid-prototype front-end concepts in Figma using AI tooling, cutting misalignment at developer handoff.
- Own a cross-sell capability identifying unsold coverage lines for existing clients (multi-million-dollar upside).
- Define strategy, roadmaps and OKRs with MD and Partner stakeholders; prioritise with RICE and MoSCoW.
- Authored product standards and ways of working now used as the benchmark across the product function.
- Mentored a colleague moving into product ownership from a client relationship role.
- Run Scrum delivery across the squads: refinement, sprint planning, release and defect triage.
- Led product rollout across 41 countries since joining, using Pendo adoption data to steer the roadmap.

Data & Analytics Product Owner (EMEA) | Kenvue (formerly a Johnson & Johnson company) | UK | Jul 2023 - Jun 2024

- Owned an EMEA portfolio of three digital, eCommerce and marketing data products - vision, roadmap and backlog.
- Built Amazon 360, uniting listing performance, sentiment and commercial data into a single view; drove multi-million-dollar sales uplift.
- Migrated digital, eCommerce and marketing data into Snowflake as reusable SQL datasets, enabling faster reporting and cutting manual data pulls.

IT Business Technology Leader (Leadership Programme) | Johnson & Johnson | UK | Sep 2022 - Jul 2023

- IT Business Partner for the ~\$500m UK Consumer Health business, spanning digital, data and operations.
- Led technology delivery across supply chain, marketing and commercial functions, keeping operations running through a period of major organisational change.
- Led the UK's on-the-ground technology separation as part of the Kenvue spin-off, covering device procurement, swaps and system cutovers.
- Designed and owned a new product development (NPD) app, tracking products from R&D through to launch.
- Seconded by the North America CIO to lead a BI tool automating stock ordering across LATAM and ASPAC (~\$1m P&L impact).
- Founded an EMEA early careers programme, line-managing three cohorts across the UK, Germany and Dubai.

Intelligent Automation Product Manager (Leadership Programme) | Johnson & Johnson | UK | Jun 2021 - Sep 2022

- Established EMEA's automation function from concept, defining its remit, objectives and focus.
- Pitched and secured ~\$1m at the Regional CIO approval board for in-house UiPath, Power Platform and Alteryx.
- Scaled the team to deliver 10+ automations, saving thousands of hours and six figures annually - a model later reused across other regions.
- Retired legacy systems, replacing them with new automation solutions built by the team.
- Recruited and led five developers across the UK, Egypt, Portugal and Kosovo, owning the team end to end: objective setting, one-to-ones, performance reviews and development.
- Deployed and enhanced Veeva PromoMats for regulated promotional content workflows.

Global Project Coordinator | Pfizer | UK | Sep 2019 - Jun 2021

- Based in Regulatory Affairs and Operations, supporting product licensing with health authorities.
- Business Analyst and Project Coordinator on Pfizer's global Pega platform, supporting product licensing with health authorities.
- Led requirements, testing and regulated release for the platform later used for Comirnaty (COVID-19 vaccine).
- Produced business and technical documentation compliant with FDA, EMA and MHRA regulatory standards.
- Managed GxP change control, audit trails and computer system validation (CSV) for regulated releases.

Technology Business Partner (Industrial Placement & Part-time) | GSK | UK | Jun 2017 - Aug 2019

- Based in Global Manufacturing Supply Chain, supporting technology delivery across manufacturing sites.
- Programme managed a multi-million-pound Overall Equipment Effectiveness (OEE) rollout across 12+ manufacturing sites, owning the vendor relationship and hardware installs through to go-live.
- Rolled out Beamex Paperless Calibration across global sites, replacing paper-based processes with GxP-compliant digital records.
- Evaluated off-the-shelf software against pharma regulatory standards, running UAT and defect management.

EDUCATION

University of Kent - BSc (Hons) Computing and Business Administration with a year in industry

First Class Honours, US GPA ~4.0

- Completed an industrial placement at GSK; retained part-time (20 hrs/week) through final year after exceeding expectations, on a unique GSK contract.
- Dissertation: The Disruption and Emergence of FinTech (First Class).

CERTIFICATIONS

SAFe 5 Agilist, ITIL v3

SKILLS, TOOLS & PLATFORMS

Product & delivery: Agile, Backlog management, Change control, Confluence, Discovery, Figma, Figma Make, ITIL, Jira, Journey mapping, MoSCoW, OKRs, Pendo, Regulated delivery, Requirements gathering, RICE, Roadmapping, SAFe, Scrum, Stakeholder management, UAT, Usability testing, User interviews, Workshops

Data & analytics (product side): ETL, Power BI, Qlik, Snowflake, SQL, Tableau

Automation: Alteryx, Automation Anywhere, Power Platform, RPA, UiPath, Veeva

Build & platforms: AWS, Beamex PCM, Cursor IDE / AI, Microsoft 365, MUI, Pega, React

Regulated & compliance: CSV, FDA / EMA / MHRA documentation, GxP
